

KI 810 Ice Vending Machine

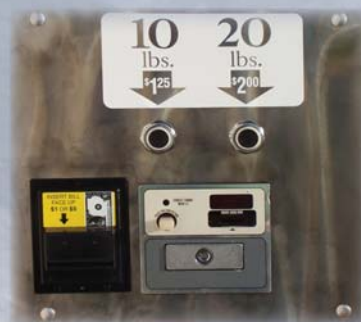

Kooler Ice is pleased to introduce its first "Green" packaged ice machine. The smallest, most productive ice vending machine on the market, it automatically makes, stores, and bags fresh ice 24 hours a day. Because the ice is made on site and "on demand", there is no waste of our earth's valuable resources, no toxic emissions and no residual harmful waste products.

What could be easier?

Because of its "vending style" design, the machine can be located outside and is simple for consumers to use. With the push of a button, the machine produces (1) 10 lb bag or (2) 10 lb bags of fresh ice using filtered water. Set the price based on market conditions and adjust it anytime, as needed.

2 different choices

The unit is designed to be used and maintained by anyone, regardless of their technical ability. The Kooler Ice machine is "smart" and will track sales automatically and notify the user if it is out of ice or bags. The machine holds 250 bags at a time and they can be easily replaced in less than two minutes.

Easy Bag replacement

The Kooler Ice Vending Machine is well insulated and requires a 220 volt power source for the ice maker and refrigeration system. Operating costs are critical and Kooler Ice has made sure that the cost to operate their machines are the lowest in the industry!

The unit comes equipped with the industry leading Scotsman Prodigy ice maker. Scotsman was chosen for its reliability, durability, and outstanding service. There are three Kooler Ice Machine configurations for you to choose from.

Model	Ice Maker	Ice Production lbs.	Storage	Depth	Length	Height	Daily
		70 F Air / 50 Water	Capacity				Max Production
KI 810	Scotsman C1030	1077 lbs	900 lbs	51"	100"	103"	100 bags/day
KI 810	Scotsman C1848	1909 lbs	900 lbs	51"	100"	103"	165 bags/day
KI 810	Scotsman C1030/C1848	2986 lbs	900 lbs	51"	100"	103"	215 bags/day

Meet Our Partners...

The **Siemens** LCD module provides owners with the ability to manage and monitor all machine functions. It also provides owners sales history information.

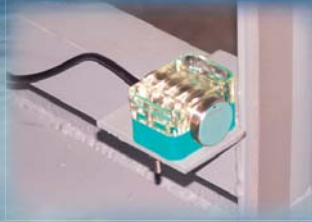

Siemens electronics and PLC provide excellent reliability and durability while giving customers the ability to access important machine information via analog or cellular modem. Siemens dealer network is a leader in the industry.

Additional Features

"Free vend" switch is standard on the machine to allow free delivery of ice for special events and promotions.

Proximity switches are used to monitor if the machine is out of ice, out of bags or if the doors are opened on the unit.

Weather proof labeled electrical quick connectors are used for safety and enable easy servicing of the machine.

Kooler ice recognized that the companies they chose to provide the critical elements of the Kooler Ice Vending Machine must be equal of quality and have a reputation for excellence in their field to keep the integrity of the product strong.

Scotsman™ Ice Makers are world wide leaders in ice machines providing a large network of dealers and service centers throughout the US. The Prodigy™ ice maker is the most efficient ice machine made with unmatched features, serviceability and support.

The "Quick Change" water filter provides ease of service, consistent ice quality and long icemaker life.

Kramer™ (Division of Carrier) an industry leader in refrigeration systems and components was selected due to its parts distribution, support and service reputation.

Riley Manufacturing builds Kooler Ice's frame with high strength carbon steel for years of service life.

What Are The Benefits of the Kooler Ice Machine?

Increased Package Ice Sales - Because the Kooler Ice Machine can be located outside as a vending machine, it is easily accessible to your customers, increasing your sales and profits without increasing your cost. It works for you 24/7. Full time access to the machine increases sales.

Increase Your Packaged Ice Profits - Double your ice profits by owning or leasing your own Kooler Ice Machine. Don't let your profits be dependent upon fuel costs, product availability and shipping schedules. The Kooler Ice machine will virtually eliminate theft, stockouts, and ensure a high product quality!

Differentiate Your Ice Business - The Kooler Ice machine will allow you to keep and expand your existing customer base and will help you compete with the new, "free standing" ice vending machines.

Quick and Convenient - With Kooler Ice, your customers put their money in and listen as the machine delivers and bags fresh ice and sends it down the chute in 10 seconds! They just twist, tie and go!

Quick Facts

- Produces 10lb bags of fresh ice
- Dispenses a bag of ice in 10 seconds
- Bin capacity - 900 lbs
- Machine weight 3600 lbs
- Requires 220 Volt single phase power source
- Vend rate can be adjusted from \$.05 to \$12.95
- Automatic notification if machine runs out of ice or bags
- Easy change bag operation - time required under 2 minutes
- Easy change water filter (requires replacement every 6 months)
- Storage Bin and Drawer are made from food grade plastic
- Frame constructed of high tensile carbon steel

Upon the purchase of a machine

After identifying a location, the owner will need to provide the water and electric to the machines location. After the water and electric are available, Kooler Ice or one of its dealers will deliver and, hook up the machine in less than 3 hours.

The machine comes with an owners manual and support phone numbers. All machines are sold with a maintenance contract that is performed by Kooler Ice or one of its distributors, therefore protecting your investment and resale value.

Bags, parts and support are available from Kooler Ice or its distributors.
